Time: 9 AM – 12 PM MT (registration 8 AM – 8:45)

Location: Ruby Canyon Dental or Remote Online Access
2552 Patterson Rd
Grand Junction, CO 81505

Course Title Description

Oral Manifestations of Systemic and Vaping-Related Diseases; Identifying the At-Risk Dental Patient in Hygiene.

This interactive workshop features the top three requested hygiene topics in 2022 all in one course! Featured topics include:

- Oral Manifestations of Systemic Disease
- Vaping Related Diseases
- The Implant Patient and the Hygiene Visit

Section one of the course begins with a review of oral disease, systemic indicators, and assessments required in Hygiene to diagnose oral disease properly. Section two takes a more in-depth review of the impact of vaping on oral disease and overall health and considerations in dental care to manage patients with a known or suspected e-cigarette or vaping product use. Section three explores hygiene considerations for implant or chronically ill dental patients. The workshop includes an exercise to formulate a comprehensive outcome-based treatment plan and documentation that mitigates risk using best practices for patient communication techniques that create awareness of the importance of the hygiene visit.

CE Duration Format

3 hours
Didactic and breakout exercises

Audience

Hygienists and other Invited Dental Professionals

Prerequisites

None

Learning Objectives

- Review types of systemic diseases and oral presentation
- Discuss the pharmacological impact of medications and oral pathology
- Review the oral manifestations of chronic systemic illnesses
- Describe the origins of e-cigarette or vaping product use, the demographic most impacted by use, the causative ingredients, the health effects, associated oral lesions.
- The dangers of vaping and dental implants
- Peri-implant diseases: causes, effects, and appearance
- Underline the importance of the patient's health history and risk assessment, and discuss the appropriate methods of extra and intraoral exams in hygiene
- The hygiene appointment process and the treatment of chronic illness and implant patients, and documentation process for patients
- Identify strategies health care providers can use to manage patients with a known or suspected e-cigarette or vaping product use
- Patient communication best practices

Presentation Materials

- Presentation slides
- Hand-outs: Slide summary, Workshop Details
